Chromium Electroplating Plating

- **TDC-1®** Hi-Tec Plating, Inc. Thin Dense Chrome
 - A matte, precision surface finish with TDC-1® conforms to surface detail for an engineered finish.
- **Traditional Hard Chrome**, AKA Industrial Hard Chrome
 - Even with the emergence of competitive coatings, hard chrome electroplating is still in demand when longer wear and resistance to abrasion is needed.
 - A properly applied hard chrome finish provides you with protection from abrasion tolerance, wear resistance as well as minimize galling or seizing of parts.
 - This can be a bright, matte or satin finish.

Electroless Nickel (EN) Plating

- **TDNC™**
Thin Dense Electroless Nickel Deposit is applicable to a wide variety of precision metal finishing needs.
- The next generation for bearing protection
- **Ni-Comp-100©**
EN surface finish for outstanding release properties
- **Mid-Phosphorus EN** metal finishes applicable to a wide variety of needs
- **High Phosphorus EN** metal finishes applicable to a wide variety of needs.

Abrasive Blasting

- Wet blasting
- Dry blasting
